

Talent Scholar Investigations

Careers in Theatre – Behind the Scenes

Mr. Hupp will discuss the realities of a life in the performing arts with a focus on theatre, from college prep to the real world. Students will look at the different kinds of careers available in the performing arts and what a young person interested in the arts can expect and explore in the world.

Panda Research

Dr. Bob Sikes will show students how scientists research the energy balance and energy budget of Pandas by looking at caloric and nutrient content of foods that Pandas eat. Students will also study what Pandas refuse to eat and why.

Virtual Reality

Dr. Swaty will introduce the students to the world of virtual reality and computer science. Students will explore 3-D by wearing special goggles for a fun and educational experience.

The Trail of Tears Comes to Life

Under the guidance of Dan Littlefield and Roy Boney of the Sequoyah Research Center, students will learn about the portion of the Trail of Tears that went through Arkansas. Also, students will be able to experience the development of two American Indian films produced at UALR.

Rocketry

Traig Born will introduce basic rocketry elements, and students will be able to participate in a rocket demonstration.

Video Production

Dr. Mark Giese of the School of Mass Communication will provide an in-depth exploration of video production. Students will be able to actively participate in the development of video.
